## PROJECT DETAILS

Project Name : Thaba Chweu Local Municipality: Community Based Plans – Wards 1 – 12, 2008  
 Client : GTZ for Thaba Chweu Local Municipality  
 Prepared by : Akanya Development Solutions

## PROJECT DESCRIPTION

The Thaba Chweu the Community Based Plans (CBPs) were developed in 2008 in collaboration with the affected communities to serve community upliftment action plans. The process of putting these together was achieved by interactively bringing together the local communities, the municipality and all the other relevant stakeholders to identify sustainable projects and initiatives that are aimed at empowering local communities. Thus in essence the CBP is was developed to:

- Assist communities with their attempts to build, strengthen, and/or sustain their local social and economic structures
- Enhance communication and the identification of special resources across various sectors of the community
- Assist the community in analyzing its strengths and weaknesses
- Assist the community in choosing the most appropriate avenues for development; and
- Assist local communities to take onus in identifying those initiatives that could be developed for improving livelihoods

The CBP documents provide a CBP process background, regional and local context, community profile, infrastructure and social services profile and community survey results. CBP community participation workshops were conducted, these led to the identification of strategies that could be used to counter the lack of development in Wards 1 - 12. Each CBP identified strategies and possible projects or initiatives that could be undertaken. The focus was also on identifying community level projects.

## PROJECT OUTCOME

The process assisted in reducing the dependency syndrome communities usually have towards government.

## SNIPPETS FROM THE CBPs
